**ASSESSMENT (05-10-26)**

**Topic Name: Structuring a basic Python conversational loop**

**TASK :**

Build a simple rule-based conversational chatbot in Python. Your chatbot must interact continuously with the user, recognize different messages, provide appropriate responses, and allow the user to exit.

**CODE:**

```
[3]
✓ 2m
▶ name = input("What is your name? ").lower().strip()

while True:

    message = input("You: ").lower().strip()

    if "exit" in message or "bye" in message:
        print(f"Bye {name}")
        break

    elif "hello" in message or "hi" in message:
        print(f"Hey there {name}")

    elif "joke" in message:
        print("That's great. Take a spoon and fill it with water.")
        print("Then jump into that 🤪")

    elif "how are you" in message:
        print(f"Thanks for asking... ❤️ How are you Mr. {name}?")

    else:
        print("Sorry I can't hear you. Try with another message")
```

**OUTPUT:**

```
... What is your name? Pinnapureddy Shiva Sai Sharan Reddy
You: how are you
Thanks for asking... ❤️ How are you Mr. pinnapureddy shiva sai sharan reddy?
You: tell me a joke
That's great. Take a spoon and fill it with water.
Then jump into that 🤪
You: Hello
Hey there pinnapureddy shiva sai sharan reddy
You: how did i know to you
Sorry I can't hear you. Try with another message
You: bye
Bye pinnapureddy shiva sai sharan reddy
```
